

YOU'VE GOT THE BEST SOFTWARE. NOW GET THE BEST TRAINING.

Whether you are an office of one or one thousand, CADD Microsystems has the knowledge and experience to get you the training you need, when and how you need it. We believe that professional development is a continual process, not just a singular learning event. Our training methodology follows this philosophy of education, reinforcement and collaboration, and delivers the skills you need to develop and advance as a professional.

JUST A FEW OF OUR TRAINING OPTIONS:

**PUBLIC
TRAINING**

**ONLINE
TRAINING**

**GROUP
TRAINING**

**ON-DEMAND
TRAINING**

**CUSTOMIZED
TRAINING**

**ONE-ON-ONE
TRAINING**

OUR EDUCATION PROGRAM:

- ✓ Is developed and taught by Autodesk certified instructors and consultants with years of experience both in the field and in the classroom.
- ✓ Addresses all learning styles through VARK methodologies: Visual, Auditory, Reading/Writing, and Kinesthetic exercises, ensuring all students can learn how they learn best.
- ✓ Promises low instructor-to-student ratios, allowing for the individual attention that is vital to successful learning.
- ✓ Has options from beginner to advanced, from on-boarding programs to project-specific training.
- ✓ Earned recognition as the top Autodesk Authorized Training Center in the Mid-Atlantic, based on student evaluations.

Don't see exactly what you need? No problem. Let us know where you want to be, and we'll get you there.

GET WHERE YOU WANT TO BE

At CADD Microsystems, we provide an array of training programs to get you to where you want to be. The best part? You can take advantage of what we currently have, or we can work together to create a solution tailored to your unique requirements. And we won't be satisfied until you are - guaranteed.

PUBLIC TRAINING

Public training is held regularly at our training facilities and taught by our certified instructors. All students follow along on high-end Dell workstations during class, get complementary refreshments, and walk away with new-found skills, a training guide to refer back to, and a certificate of completion.

GROUP TRAINING

Group training is a private training course specifically for your company that follows our standard course curriculum. This can be delivered at one of our training facilities, or we'll come to your office with our training laptops. Students receive all of the same training benefits as they would with our public classes.

CUSTOMIZED TRAINING

Our team of experts will work with you to modify our curriculum to focus on topics specific to your day-to-day work, and we can even use your real-life project data. The training can take place at one of our training facilities or at your office. Courses range from beginner topics like basic detailing, to advanced topics like multi-model integration tools.

ONLINE TRAINING

Our online training is live, instructor-led, web-based instruction that gives you the freedom to attend from virtually anywhere. The interactive platform allows the instructor to interact with each student's screen, and students can ask questions via voice or chat box, ensuring the instructor-student engagement is just as valuable as it is at our training facilities.

ONE-ON-ONE TRAINING

If you need training on specific topics, or want support on a new project, our one-on-one training is a flexible, customized way to get you the information you need on a timely basis, to keep you and your projects moving forward.

ON-DEMAND TRAINING

Our on-demand training delivers you the training resources you need, when, where and how it's convenient for you. These courses offer searchable content, interactive text, audio instruction, video demonstrations and hands-on exercises.

THE CADD COMMUNITY

The CADD Community is an exclusive, online portal that provides you with access to whitepapers, training videos, professionally developed apps and extensions, model content (families), all based on a powerful learning management system.

To learn more about our training, go to www.caddmicrosystems.com/training.
